**Available for Immediate Joining**

## PROFESSIONAL SUMMARY

Computer Science Engineering graduate (2026) with hands-on experience in Full Stack Development, Backend Development, REST APIs, Data Analytics, and AI-driven applications. Proficient in Python, JavaScript, React.js, SQL, MySQL, Power BI, Excel, and data-processing tools, with experience developing web applications, backend APIs, automated workflows, and business intelligence dashboards. Experienced in Generative AI, Machine Learning, data analysis, and API integration, with a focus on building scalable software solutions and transforming data into actionable insights. Completed a 4-month remote internship involving Python automation, data processing, REST API integration, and analytics workflows, reducing manual reporting effort by 30–40%. Seeking Software Developer, Backend Developer, Full Stack Developer, or Data Analyst roles.

## EDUCATION

**Bachelor of Engineering – Computer Science**

Anjuman Institute of Technology and Management, Bhatkal

**December 2022 – June 2026**

Karnataka, India

- **CGPA:** 7.91 / 10.0
- **Relevant Coursework:** Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks, Software Engineering

## TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, Java, JavaScript (ES6+)
- **Data Analytics:** SQL, Microsoft Excel, Power BI, Data Cleaning, Data Transformation, Data Visualization, Dashboard Development, Exploratory Data Analysis (EDA)
- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js, Flask, RESTful APIs, JWT Authentication, RBAC, API Integration, MVC Architecture
- **Databases:** MySQL, Database Design, Normalization, Transactions, Query Optimization
- **Tools:** Git, GitHub, Postman, VS Code, JSON

## PROFESSIONAL EXPERIENCE

**Data Analytics Intern**

Procraft

**December 2025 – March 2026**

Dubai, UAE (Remote)

*Technologies: SQL, Microsoft Excel, Power BI*

- Developed data-processing pipelines using Python, SQL, and Pandas to transform, validate, and analyze business datasets.
- Built automated data validation and monitoring workflows to improve data quality and reporting accuracy.
- Designed and optimized SQL queries, joins, aggregations, and data extraction processes for analytics applications.
- Created interactive Power BI dashboards and business intelligence reports for revenue tracking, customer segmentation, and sales performance analysis.

**Python & Generative AI Developer Trainee**

Golden Bird Education

**February 2025 – May 2025**

Mumbai, India (Remote)

*Technologies: Python, LLM APIs, REST APIs, Git, GitHub*

- Developed interactive AI applications using LLMs, prompt engineering, and dynamic user interfaces.
- Built Python-based automation workflows integrated with Generative AI APIs.
- Implemented CRUD systems and REST API workflows for application and data management.
- Designed REST API integrations and data-processing pipelines to support AI-driven applications.

## PROJECTS

**FlexiFit – AI Personalized Fitness Coach**

*Technologies: React.js, Next.js, MediaPipe, TensorFlow.js, OpenCV, Gemini AI*

**GitHub:** FlexiFit – AI Personalized Fitness Coach

- Developed an AI-powered fitness platform using computer vision and pose estimation for real-time exercise monitoring.
- Implemented real-time posture correction, repetition counting, and exercise tracking to assist users during workouts.
- Integrated Gemini AI to provide personalized workout and diet recommendations.
- Built a secure full-stack application with authentication and progress analytics.

### GitHub: E-Commerce Sales Analysis Dashboard

- Analyzed e-commerce transaction data to identify revenue patterns, customer purchasing behavior, and category-wise sales trends.
- Built an interactive Power BI dashboard with KPI cards, drill-through reports, and slicers for business analysis.
- Performed data cleaning, transformation, and relationship modeling to improve reporting accuracy and usability.
- Created customized visualizations to support sales performance monitoring and data-driven decisions.

### AI Sign Language Detection Using Deep Learning    Technologies: Python, TensorFlow, Keras, OpenCV, MediaPipe, NumPy, CNN

#### GitHub: AI Sign Language Detection Using Deep Learning

- Developed a real-time sign language recognition system using CNN, OpenCV, and MediaPipe.
- Implemented hand tracking, gesture classification, and image preprocessing for spatial feature extraction.
- Trained and optimized TensorFlow models for hand gesture recognition and sign-to-text conversion.
- Applied data augmentation and model evaluation techniques to improve recognition robustness.
